

HYBRID  **AG**

BIOLOGICAL & PLANT STIMULANTS

MYCRO-TEC

SP

MYCRO-TEC

SP

An inoculum of blended biologicals of three different beneficial micro-species including *Bacillus Amyloliquefaciens*, *Trichoderma Harzianum*, *Streptomyces* containing up to 10 billion micro-organisms per mL of liquid! These organisms provide competitive exclusion of other pathogenic organisms and encourage more vigorous root systems. SP also contains a cellulose digester to aid in organic matter breakdown such as leaf matter, stubble, etc.

Key Benefits

Biological: Stimulates enzymes; Acts as an organic catalyst; Encourages soil micro-organisms; Increases root respiration and formation; Increases plant membrane permeability; Increases nutrient translocation.

Mineral: Increases soil cation exchange capacity; Improves buffering capacity; Rich in organic & mineral substances; Retains water soluble fertilisers in soil. Has specific Phosphorus, Potassium, Zinc and Nitrogen solubilising biology, giving you access to the soil nutrient bank and increasing plant nutrient availability.

Physical: Improves friability of soil; Improves soil aeration; Increases water holding capacity; Reduces soil erosion.

APPLICATION RATES

1-10 litres per hectare or as advised

Dilution rate

1:20 or as advised

**Store in a cool place away from sunlight
Stir well before use**

TYPICAL ANALYSIS

Major Elements	w/v%
Ave. Concentration	10 ¹⁰ cfu/G
